

## JOB DESCRIPTION

We want to attract and retain the best talent in the industry. To meet this goal, we are creating a workplace where our employees are top priority;

### **Feel The Energy Of...**

**Our Assets** – Our current basins consistently see excellent results. With the addition of key acquisitions, our growth projections are extremely strong. We will remain committed to improving the quality, safety and performance of our assets.

**Our Performance** – We continue to demonstrate leadership in the mid-stream marketplace. We were ranked # 1 and #2 in "Customer Satisfaction" in the EnergyPoint Research, Inc. Natural Gas Midstream Services Customer Satisfaction Survey for 2006 and 2009, respectively.

**Our People** – Here at MarkWest, we believe our continued success depends on the quality of our employees. We believe strongly that employee satisfaction leads to customer satisfaction.

Come join our team as our **Plant Engineer** at our Corpus Christi, TX location. This position reports to the Director of Engineering.

### **POSITION SUMMARY:**

Provides technical support, leadership, and oversight for all electrical and instrumentation needs (both operational and project needs); works effectively with the company's operations group, "tier-one" engineers, project managers, designers, and drafters in the design, implementation, and operation of the Company's electrical and instrumentation assets; initiates, reviews, modifies, and/or implements company standards and guidelines.

### **ESSENTIAL DUTIES/RESPONSIBILITIES:**

- Take the lead in specifying, bidding, purchasing, expediting, pre-commissioning, commissioning, and starting-up the electrical and instrumentation assets required to support capital growth projects, replacements in kind, or expense projects.
- Develop and maintain relationships with equipment vendors, determining the limits and capabilities of each vendor.
- Oversee the designs of new electrical equipment and instrument installations; provide guidance and mentor drafters and designers on electrical and instrument drawing requirements.
- Working with operations and facility engineers, identify optimization and efficiency projects and perform evaluations to determine their economic viability;

- Review engineering standards and provide feedback and recommendations as appropriate.
- Be able to handle assignments and small projects, provide regular status updates (communicating with project stakeholders), and be proficient in resource scheduling.
- Provide support for process servers, PLC/HMI systems, on-stream analyzers, and Honeywell TDC3000 and Experion control systems.
- Have strong problem-solving skills and a creative approach for generating new ideas.

### **SUPERVISORY DUTIES:**

No

### **JOB QUALIFICATIONS:**

- This position requires a degree in Electrical Engineering from a 4-year accredited college or university and at least 5-years of experience in the gas processing and gas gathering disciplines.
- Current valid driver's license required.
- A Professional Engineering License is preferred.
- Must have excellent verbal and written communication skills with the ability to communicate effectively with all levels of individuals/employees.

### **WORK ENVIRONMENT:**

The position is located in the Company's Javelina Plant in Corpus Christi, TX. Travel to other company locations may be required but is anticipated to be less than 25%.

Interested and qualified candidates should contact us immediately to be considered for this terrific opportunity. Please send your resume to [employment@markwest.com](mailto:employment@markwest.com).
