

Who We Are

MarkWest Energy Partners, L.P. (NYSE: MWE) is a publicly traded master limited partnership with an enterprise value of more than \$7 billion. As a leading provider of midstream services in the natural gas industry, MarkWest's business strategy is to deliver best-of-class service by developing high-quality, strategically located assets in the liquids-rich areas of the emerging natural gas resource plays in the United States.

Midstream Services

- Gather, compress, treat, process and transport natural gas
- Transport, fractionate, store, and market natural gas liquids (NGLs), such as ethane, propane, butane, and natural gasoline
- Gather and transport crude oil

High-Quality, Diversified Assets

- Provides midstream services for approximately 3 billion cubic feet per day of natural gas in nine states
- Long-term contracts with high-quality producers to develop the Marcellus Shale, Huron/Berea Shale, Woodford Shale, Haynesville Shale, and Granite Wash formation
- Approximately 2,700 miles of pipeline and more than 400,000 horsepower of compression
- 115,000 barrels per day of NGL fractionation capacity, with additional capacity of over 200,000 barrels per day coming online in the next 2 years

Core Principles

- MarkWest contributes to the development of environmentally clean energy while complying with or exceeding regulatory requirements
- MarkWest acts with honesty, integrity, and trustworthiness
- MarkWest encourages innovation at all levels within the company
- MarkWest is committed to building a performance-based culture based on trust, accountability, safety, and teamwork
- MarkWest strives to deliver best-of-class midstream services that consistently exceed the expectations of its producer customers

In 2011, MarkWest ranked #1 in seven categories including Total Customer Satisfaction in EnergyPoint Research's Customer Satisfaction Survey

Appalachian Basin

We are the largest processor and fractionator of natural gas in the Appalachian Basin, with fully integrated processing, fractionation, storage, and marketing operations. The Appalachian Basin is a large natural gas producing region characterized by long-lived reserves and modest decline rates. Our Appalachian assets include five natural gas processing plants, and NGL pipeline, and one fractionation and storage facility.

Northeast Operations

MarkWest has been a leading provider of integrated midstream services in the Appalachian basin for more than 20 years

- **Areas of operation:** Kentucky and West Virginia
- **Resource Plays:** Appalachian Basin and Huron/Berea Shale
- **Processing:** 505 MMcf/d processing capacity (five processing facilities)
- **Fractionation:** 24,000 Bbl/d NGL fractionator at our Siloam complex in South Shore, Kentucky
- **Storage:** 285,000-barrel propane storage capacity
- **Market Access:** TCO; NGL marketing by truck, rail, and barge
- **Under Construction:** Expansion of cryogenic processing capacity at Langley, Kentucky complex

In 2011, we significantly enhanced our strategic position in the Northeast with the acquisition of EQT's Langley processing complex in southeastern Kentucky and the completion of Ranger NGL pipeline, which connects our Langley complex to the Siloam fractionator.

Community Involvement

We are dedicated to making a difference in the communities where we operate and many local charities count on our contributions.

- Contributions are made to organizations such as the American Cancer Society, Freedom Builders, Lewiston Community Sharing, and The Father Fred Foundation.
- MarkWest also sponsors several local sporting events, fire departments, and individuals within the community who have suffered from a natural disaster.

.....
As a result of our extensive NGL processing, fractionation, marketing, and storage capabilities in the Northeast, we are uniquely positioned to capitalize on the tremendous growth in the shale plays located throughout the region
