

Who We Are

MarkWest Energy Partners, L.P. (NYSE: MWE) is a publicly traded master limited partnership with an enterprise value of approximately \$7 billion. As a leading provider of midstream services in the natural gas industry, MarkWest's business strategy is to deliver best-of-class service by developing high-quality, strategically located assets in the liquids-rich areas of the emerging natural gas resource plays in the United States.

Midstream Services

- Gather, compress, treat, process and transport natural gas
- Transport, fractionate, store, and market natural gas liquids (NGLs), such as ethane, propane, butane, and natural gasoline
- Gather and transport crude oil

High-Quality, Diversified Assets

- Provides midstream services for approximately 3 billion cubic feet per day of natural gas in nine states
- Long-term contracts with high-quality producers to develop the Marcellus Shale, Huron/Berea Shale, Woodford Shale, Haynesville Shale, and Granite Wash formation
- Approximately 2,700 miles of pipeline and more than 400,000 horsepower of compression
- 115,000 barrels per day of NGL fractionation capacity, with additional capacity of over 200,000 barrels per day coming online in the next 2 years

Core Principles

- MarkWest contributes to the development of environmentally clean energy while complying with or exceeding regulatory requirements
- MarkWest acts with honesty, integrity, and trustworthiness
- MarkWest encourages innovation at all levels within the company
- MarkWest is committed to building a performance-based culture based on trust, accountability, safety, and teamwork
- MarkWest strives to deliver best-of-class midstream services that consistently exceed the expectations of its producer customers

In 2011, MarkWest ranked #1 in seven categories including Total Customer Satisfaction in EnergyPoint Research's Customer Satisfaction Survey

Javelina

The Gulf Coast Segment consists of the Javelina gas processing and fractionation facility in Corpus Christi, Texas. Javelina treats, processes, and fractionates off-gas from six local crude oil refineries.

MarkWest's Javelina Operations

- **Processing:** 140 MMcf/d cryogenic processing capacity
- **Fractionation:** 29,000 Bbl/d NGL fractionation capacity
- **Other:**
 - NGL marketing; including ethane, ethylene, propane, propylene, isobutane, normal butane, butylenes, and pentanes
 - High-purity hydrogen production
 - The steam methane reformer, owned and operated by Air Products, is integrated with Javelina operations

The Gulf Coast Segment accounts for 12% of the net operating margin of the company.

Javelina Community Contribution

MarkWest Javelina employs about 50 individuals and is proud to support the following organizations:

- Contributions are made to national organizations, including: the American Diabetes Association, Muscular Dystrophy Association, American Red Cross, United Way, and Boys and Girls Club
