

## Who We Are

**MarkWest Energy Partners, L.P.** (NYSE: MWE) is a publicly traded master limited partnership with an enterprise value of approximately \$7 billion. As a leading provider of midstream services in the natural gas industry, MarkWest's business strategy is to deliver best-of-class service by developing high-quality, strategically located assets in the liquids-rich areas of the emerging natural gas resource plays in the United States.

### Midstream Services

- Gather, compress, treat, process and transport natural gas
- Transport, fractionate, store, and market natural gas liquids (NGLs), such as ethane, propane, butane, and natural gasoline
- Gather and transport crude oil

### High-Quality, Diversified Assets

- Provides midstream services for approximately 3 billion cubic feet per day of natural gas in nine states
- Long-term contracts with high-quality producers to develop the Marcellus Shale, Huron/Berea Shale, Woodford Shale, Haynesville Shale, and Granite Wash formation
- Approximately 2,700 miles of pipeline and more than 400,000 horsepower of compression
- 115,000 barrels per day of NGL fractionation capacity, with additional capacity of over 200,000 barrels per day coming online in the next 2 years

### Core Principles

- MarkWest contributes to the development of environmentally clean energy while complying with or exceeding regulatory requirements
- MarkWest acts with honesty, integrity, and trustworthiness
- MarkWest encourages innovation at all levels within the company
- MarkWest is committed to building a performance-based culture based on trust, accountability, safety, and teamwork
- MarkWest strives to deliver best-of-class midstream services that consistently exceed the expectations of its producer customers

*In 2011, MarkWest ranked #1 in seven categories including Total Customer Satisfaction in EnergyPoint Research's Customer Satisfaction Survey*

## Texas

In the Southwest Segment, we gather, process, treat, and transport natural gas and natural gas liquids (NGL) in East Texas, Southeast Oklahoma, Western Oklahoma, and several smaller systems throughout the Southwest. Our assets in the Southwest include 16 natural gas gathering systems, seven natural gas processing/treating plants, three intrastate gas pipelines, and two interstate gas pipelines.

### Texas Operations

- **Areas of Operation:** Panola, Harrison, Rusk, and Nacogdoches counties, Texas
- **Resource Plays:** Cotton Valley, Travis Peak, and Pettit formations, and the Haynesville Shale
- **Gathering:** 750 MMcf/d gathering capacity
- **Processing:** 500 MMcf/d processing capacity
- **Transportation:** Three lateral pipelines with over 500 MMcf/d of capacity
- **Market Access:** NGPL, CEGT, and TGT West TX pipelines
- **Other:** MarkWest also owns several other small gathering systems in Louisiana, Mississippi, and New Mexico

*The Haynesville Shale is an extremely productive resource play which we believe will continue to be an emphasis for our East Texas producer customers as a result of the tremendous growth potential from the liquids-rich zones of the play*

### Community Involvement

We are dedicated to protecting the health and well-being of our employees, customers, neighbors, and the environment. We give to local, regional and national organizations and provide sponsorships to community initiatives.

- We donate to the West Shore Volunteer Fire Department and contribute to the Permian Basin Natural Gas Society Scholarship fund.
- We contribute to several national and local organizations, fundraisers, and causes
- We support and promote education in the oil and gas sector by donating computer equipment and meters to petroleum classes at Panola College.

*We have more than 200,000 prospective Haynesville acres dedicated to our system and we expect continued growth in Haynesville production*
