

JOB DESCRIPTION

We want to attract and retain the best talent in the industry. To meet this goal, we are creating a workplace where our employees are top priority;

Feel The Energy Of...

Our Assets – Our current basins consistently see excellent results. With the addition of key acquisitions, our growth projections are extremely strong. We will remain committed to improving the quality, safety and performance of our assets.

Our Performance – We continue to demonstrate leadership in the mid-stream marketplace. We were ranked # 1 and #2 in "Customer Satisfaction" in the Energy Point Research, Inc. Natural Gas Midstream Services Customer Satisfaction Survey for 2006 and 2009, respectively.

Our People – Here at MarkWest, we believe our continued success depends on the quality of our employees. We believe strongly that employee satisfaction leads to customer satisfaction.

Come join our team as our **Compression Construction Manager** at our Canonsburg, PA, and location. This position reports to the Engineering Manager.

POSITION SUMMARY:

Responsible for project management and field supervision from development through commissioning on compression projects for the Liberty Business Unit. Performs all work in compliance with company standards, procedures, and government requirements.

ESSENTIAL DUTIES/RESPONSIBILITIES:

- Manage compressor station projects with a focus on quality, compliance with engineering drawings, applicable code and standards, and construction schedule and cost.
- Coordinate with engineering supporting construction activities.
- Compliance with judicial regulatory requirements regarding engineering and field compression operations.
- Balance resource allocation to new projects with ongoing construction and maintenance of existing compressor stations.
- Develop project scopes, estimate project costs, and prepare funding requests.

- Develop project budgets and control project costs.
- Prepare bid requests and evaluate such based on sound engineering and business principles.
- Maintain knowledge and ability to apply engineering standards as they relate to the specific project.
- Handle assignments and projects with minimal supervision and complete within acceptable time standards.
- Maintain knowledge of natural gas compressor station installations and operations.

SUPERVISORY DUTIES:

Yes

JOB QUALIFICATIONS:

- BS in Engineering, Construction, or Construction Management is preferred, but not required.
- Requires 10+ years natural gas compression project experience.
- Must have demonstrated leadership experience and skills to manage large or multiple construction projects.
- Need working knowledge of OSHA, applicable construction codes, standards, regulations, and familiarity with the construction and environmental permitting process.
- Requires the ability to organize and drive project activities.
- Must be a hands-on team player, willing to travel locally.
- A PLUS to have experience with union craft labor.
- Current valid driver's license required.
- Must have excellent verbal and written communication skills with the ability to communicate effectively with all levels of individuals/employees.

WORK ENVIRONMENT:

While performing the duties of this job, the employee is often exposed to outside weather conditions, which could range from extreme cold to hot, humid conditions. Walking on uneven terrain is often required during normal work duties. High noise areas may be encountered. At all times proper PPE must be used in work areas.

Interested and qualified candidates should contact us immediately to be considered for this terrific opportunity. Please send your resume to employment@markwest.com.
