

JOB DESCRIPTION

We want to attract and retain the best talent in the industry. To meet this goal, we are creating a workplace where our employees are top priority;

Feel The Energy Of...

Our Assets – Our current basins consistently see excellent results. With the addition of key acquisitions, our growth projections are extremely strong. We will remain committed to improving the quality, safety and performance of our assets.

Our Performance – We continue to demonstrate leadership in the mid-stream marketplace. We were ranked # 1 and #2 in "Customer Satisfaction" in the EnergyPoint Research, Inc. Natural Gas Midstream Services Customer Satisfaction Survey for 2006 and 2009, respectively.

Our People – Here at MarkWest, we believe our continued success depends on the quality of our employees. We believe strongly that employee satisfaction leads to customer satisfaction.

Come join our team as our **IT Systems Analyst-Field/Operations Systems** at our Denver, CO location. This position reports to the IT Director.

POSITION SUMMARY:

MarkWest Hydrocarbon, Inc. (AMEX: MWP) controls and operates MarkWest Energy Partners, L.P. (NYSE: MWE), a publicly traded limited partnership engaged in the gathering, processing and transmission of natural gas; the transportation, fractionation and storage of natural gas liquids; and the gathering and transportation of crude oil. Also, we also market natural gas and natural gas liquids.

MarkWest is looking for an experienced IT Systems Analyst to design and develop IT solutions that support operations oriented systems. The position will gather requirements, create designs and execute solutions that support all aspects of field operations. This includes plant data collection from plant control systems and SCADA systems, solutions for Environmental, Health and Safety (EH&S) users, and measurement functions. All aspects of these systems from design to implementation and support are managed by the System Analyst. The highly motivated individual selected for this position will have excellent communication skills and can excel when assigned multiple projects and support tasks.

ESSENTIAL DUTIES/RESPONSIBILITIES:

- Functional requirement clarification, creation and optimization.
- Translate, design, validate reporting and program requirements.
- Develop, test and deploy solutions that meet business requirements.
- Work with business customers to analyze processes and develop system requirements.
- Ability to manage process development, and drive improvements that strive for operational excellence.
- Interpret existing IT controls environment and apply to existing and proposed processes to ensure compliance.
- Interact with and effectively communicate to all levels of business customers.
- Identify opportunities and deliver IT solutions to the internal business units.
- Work directly with business owners to understand, document and formalize detailed system requirements.
- Own the development and execution of the functional specifications.
- Ensure collaboration and communication with internal auditing to verify implemented solutions operate according to the existing IT control and compliance environment.
- Resolve issues, follow change management and mitigate risks associated with project activities.
- Enable and support the PMO office in all project related activities.
- Manage multiple projects simultaneously.

SUPERVISORY DUTIES:

No

JOB QUALIFICATIONS:

- 3+ years experience as Systems Analyst delivering enterprise level solutions.
- Bachelor degree in business, IT or related experience required.
- Background in Oil and Gas strongly preferred. (Gathering field SCADA systems, Plant control DCS systems, EH&S Compliance, Gas and Liquid Measurement)
- Exposure to Oil and Gas Applications: InTouch, ClearSCADA, DeltaV, Foxboro
- Visual Studio, SQL Server Integration Services, SQL Server Reporting Services, FlexLM.
- High proficiency using Microsoft Office, MS Project, Visio.
- Results oriented individual that can autonomously manage all aspects of a systems project implementation with minimal supervision from IT management.
- Demonstrated ability to successfully communicate with all levels within an organization and facilitate understanding of processes and issues from a business perspective.

- Ability to understand business level requirements and translate into solutions based on existing IT systems, controls and infrastructure.
- Effectively work to gain credibility from the business by; acting with integrity, promoting trust and respect within the project teams and continually managing change across the organization.

WORKING CONDITIONS:

Physical Demands:

Requires sitting throughout most of the day, interspersed with short trips throughout the office.

Work Environment:

Primarily in an office environment.

Materials and Equipment Used:

Personal computer, phone, fax and copier.

Interested and qualified candidates should contact us immediately to be considered for this terrific opportunity. Please send your resume to employment@markwest.com.
